DETAILED ACTION

Claim Rejections - 35 USC § 102

1. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Beiersdorf.

The discussions of Beiersdorf in previous office actions are incorporated here by reference. Beiersdorf discloses a cosmetic composition comprising the compound recited in claim 11, and teaches that this composition can be applied to skin. Applicant has not provided a definition of "sliding parts" as recited in claim 11. It is therefore the examiner's position that skin is capable of acting as a sliding part. For example, if the composition is applied to a hand, and the hand then used to apply the composition to other body parts, the hand will slide along the skin of the other body parts.

Claim Rejections - 35 USC § 103

2. Claim 11 is rejected under 35 U.S.C. 103(a) as being obvious over Kawata (JP 2002-069472).

An English translation of Kawata, which is attached, has been used in setting forth the rejection. In paragraph 1, Kawata discloses a lubricating composition which provides excellent performance when applied to a mechanical sliding part. In paragraphs 6-7, Kawata discloses that the composition comprises a compound, and in the table of paragraph 39 Kawata discloses a compound (LUB-4) differing from the claimed compound only in that it contains a diazine ring instead of a triazine.

In paragraph 29, Kawata teaches that the D group of the compound is preferably a triazine. Therefore, it would have been obvious to one of ordinary skill in the art to

replace the diazine of LUB-4 with a triazine, and to use the resulting composition to lubricate sliding parts, as discussed in paragraph 1 of Kawata and meeting the limitations of claim 11.

Allowable Subject Matter

3. Claims 4 and 7-10 are allowed for the reasons set forth in previous office actions.
